

SIMON WOLFGANG FUNKE

Simula Research Laboratory, Martin Linges vei 17, 1364 Fornebu, Norway
email: simon@simula.no *web:* www.simonfunke.com *phone:* +47 40 62 55 86

PERSONAL INFORMATION

Name: Funke, Simon Wolfgang
Date of birth: 17.10.1983
Sex: Male
Nationality: German

POSITIONS

2016 - today **Research Scientist, Simula Research Laboratory, Oslo, Norway.**
2016 - today **MC Member, COST Action TD1307 (European Model Reduction Network).**
2015 - today **Adjoint Associate Professor, University of Oslo, Norway.**
2014 - today **CTO, IMERSO AS, Oslo, Norway.**
2013 - 2015 **Postdoctoral Fellow, Simula Research Laboratory, Oslo, Norway.**
In addition, a 20% adjoint PostDoc position in 2014 at Imperial College London, UK.
2014 - 2015 **Consultant, Kalkulo AS, Oslo, Norway.**
2013 - 2014 **Consultant, E.ON AG, Düsseldorf, Germany.**

EDUCATION

2009 - 2013 **PhD, Computational science, Imperial College London, UK.**

- Thesis title: *The automation of PDE-constrained optimisation and its applications.*
- Department of Earth Science and Engineering.
- Supervisors: M.D. Piggott, P.E. Farrell, P.A. Allison, G.J. Gorman.
- Date of approved disputation: 01.03.2013.

2007 **Erasmus, École normale supérieure de Lyon, France.**
2004 - 2009 **Diplom, Mathematics, Technische Universität München, Germany.**

- Passed with high distinction (1.0).
- Thesis title: *Fast solvers for the Navier-Stokes equations on high Reynold numbers.*
- Department of Mathematics.
- The German Diplom is equivalent to a Master degree.
- Supervisor: M. Ulbrich.

AWARDS AND PRIZES

- **Wilkinson Prize for Numerical Software, 2015**
The Wilkinson prize for Numerical Software is a prestigious prize in scientific computing, awarded every four years to the authors of an outstanding piece of numerical software. In 2015, the prize was awarded to Funke and his co-authors P.E. Farrell, D.A. Ham and M.E. Rognes for the high-level AD tool dolfin-adjoint.

- Best Poster Award, CSE 2015
- Imperial College Startup Venture Catalyst Award, 2013
- Imperial College Excellence Award, 2010
- Grantham Institute for Climate Change and Fujitsu CASE Studentship, 2009
- Google Interactivism Award, 2009
- Hurwitz-Association Award for an excellence diploma thesis, 2009

FUNDING

- PI on NOK 7M FRIPRO Young Research Talent “Simulation-based optimisation with dynamic domains”, (#251237/F20), 2016
- EU Horizon 2020 SME instrument, IMERSO AS, 2015

MOBILITY

Studied and worked in research institutions in **Germany, France, UK and Norway** (> 6 months).

Shorter research visits:

- Heidelberg Laureate Forum, Germany (2016)
- Texas A&M University, USA (2015)
- Humboldt University of Berlin, Germany (2013)
- Simula Research Laboratory, Norway (2012)
- Isaac Newton Institute, Cambridge, UK (2012)
- Institut of Atmospheric Physics, Beijing, China (2011).

SUPERVISION

PostDocs: August Johannsson (Simula).

PhD students: Jorgen Dokken (Simula), David Culley (Imperial College, co-supervisor).

TEACHING ACTIVITIES

2015 - today **Lecturer**, INF3331/INF4331 Higher-level programming, University of Oslo, Norway.

2014 - today **Workshop**, FEniCS/dolfin-adjoint workshops: Technical University of Munich (2016, 5 days), SUURPH workshop, Simula (2016, 1 day), Simula (2016, 2 days), Simula (2014, 1 day), Zhejiang University (2014, 5 days).

2010 - 2012 **Teaching assistant** for courses on computational science, programming and mathematics. Department of Earth Science and Engineering, Imperial College London, UK.

COMMISSIONS OF TRUST

2013 - today **Reviewer** for SIAM Journal on Scientific Computing (SIAM), Computer Physics Communications (Elsevier), Energies (MDPI) and European Wave and Tidal Energy Conference Series and Geoscientific Model Development (GMD), Applied Energy.

2015-today **Examiner** for 2 Master projects.

2015 **Organiser** of a Workshop on Advanced Techniques in Biomedical Computing, *Center for Biomedical Computing*.

2015 **Organiser** of a Mini-symposium on Efficient Solvers for PDE-constrained Optimization, *SIAM CSE15*.

RESEARCH INTEREST/RESEARCH PROFILE

Funke's research interests center around optimisation problems governed by partial differential equations, with a focus on their numerical solution. In particular, he is interested in the automated derivation of adjoint and tangent linear models and their use in optimal control, data inversion and design optimisation. He is a founder of the dolfin-adjoint project, a software which automatically derives adjoint models from complex computer models solving partial differential equations based on a high-level symbolic problem specification language that mimics mathematical notation.

Funke applies these advances to applications in a wide variety of different domains including renewable energy and bioengineering. For the renewable energy sector, he developed OpenTidalFarm, an open-source software for optimising of tidal turbine farms, such as the optimal position of turbines within the farm. In bioengineering, he develops data assimilation techniques for blood flow simulations, with the aim to tune high-fidelity numerical blood flow models to match with MRI measurements.

DISSEMINATION

Simon Funke attended various national and international conferences. The following list presents a selection of presentations:

Designing Tidal Turbine Arrays With PDE-constrained Optimisation, *ESCO2016*, Plzeň, Czech Republic, 2016

Best poster award, dolfin-adjoint, automated adjoint models for FEniCS, *SIAM Conference on Computational Science*, Salt Lake City, USA, 2015

Tidal Farm Layout Optimisation and Resource Assessment based on PDE-constrained optimisation, *International Conference on Ocean Energy*, Halifax, Canada, 2014

Invited talk, Introduction to FEniCS and automated adjoints, *Norwegian Meteorological Institute*, Oslo, Norway, 2014

PDE-constrained optimisation in Hilbert spaces, *FEniCS'14*, Paris, France, 2014

Invited talk An introduction to libadjoint, Institut of Atmospheric Physics, Beijing, China, July 2011

OTHER PRIZES

Imperial College Startup Venture Catalyst Award, 2013

Winner of BigDataHackthon for developing a machine learning algorithm that predicts the influence of people, May 2013.

Winner of the Rewired State Hack, for novel developments for a charity that aims to improve surgical care in Africa, December 2012.

Invitation to OpenITP & Rio de Janeiro RightsCon with the goal to develop realtime censorship detection, May 2012.

Google Interactivism Award for developing a NHS health care web application that aims to improve waiting times in hospitals, 2012.

Winner of WaterHackathon London for developing a reporting platform for managing sanitation complaints in Tanzania. The project received media attention and was featured on the BBC, Africa, October 2011.
